

IN THE CLAIMS:

Amend claims 2-3, cancel claim 9, and add claim 10.

1. (Original). Container (1) with transparent, cylindrical container wall and a jacket (8) covering the entire container wall, containing a liquid or freeze-dried galenic formulation (7) characterized in that the jacket (8) is of an opaque design so that it can be determined whether in the container there are solid particles or a liquid or a liquid with still undissolved particles (9) but not what the actual colour of the contents is.
2. (Original). Container according to claim 1, characterized in that the jacket (8) consists of coloured material.
3. (Currently amended). Container according to ~~one of the claims~~ claim 1 to 2, characterized in that jacket (8) comprises a thermally formable synthetic material.
4. (Currently amended). Container according to ~~one of the claims~~ claim 1 to 3, characterized in that the jacket (8) comprises a performed synthetic material jacket lying fully against the container wall.
5. (Original). Container according to claim 4, characterized in that the synthetic material jacket comprises two half shells (8a,8b) connected hingedly to one another.
6. (Original). Container according to claim 5, characterized in that the two half shells are kept together by a safety sealing tape (10) enclosing the half shells.
7. (Original). Container according to claim 6, characterized in that the safety sealing tape can be written on or that on the safety sealing tape a printed or writeable label can be placed.

8. (Original). Container according to claim 5, characterized in that the half shells (8a, 8b) are undetachably to the container wall (2).

9. (Canceled).

10. (New). Set of containers, comprising a plurality of containers, each container having a transparent cylindrical container wall, and a jacket (8) covering the entire container wall and containing a liquid of freeze-dried galenic formulation (7), wherein the jacket (8) is of an opaque design so that is can be determined whether in the container there are solid particles, or a liquid, or a liquid with still undissolved particles (9) but not what the actual colour of the contents is, wherein not all containers have the same contents, and wherein all containers are provided with an identical jacket (8), and all containers can only be distinguished from one another by lettering or numbering.
